The wage rates under column *Total Hourly Wage Rates* as set forth by the Committee are the minimum wage rates to be paid and shall not prevent the employer from paying a higher wage rate. However, the *Hourly Rate* column plus the *Other Hourly Compensation* column must equal the *Total Hourly Wage Rate* column.

The wage rates are established on the date signed, however, if the project is not awarded within 180 days a new updates wage rate shall be required.

Stipulation as to the employment of apprentices: All apprentices will be permitted to work at less than the predetermined rate for the classification of work they perform when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Bureau of Apprenticeship and Training. Their wage rate will be their individual warranted percentage of the herein listed skilled classification prevailing wage as approved by the Bureau of Apprenticeship and Training. Apprentices shall be permitted to work only as the ration to Journeyman in the Apprenticeship Program standards state.

The absence of a wage determination for the classes of semi-skilled and unskilled workers in a particular classification is the result of the committees determination that the prevailing practice in the immediate locality is not to use semi-skilled workers in that classification on construction sites.

The attached job classification document, Statewide Classifications and Descriptions for Determining Rates for Building Construction, completely describes each job classification which is contained on this scale. This document is the only reference which is applicable in determining the job classification of an individual worker and must be referred to when assigning a classification to a worker.
